

Discovering Our Social World

Western  SocialScience

Welcome to the Faculty of Social Science at Western

WHEN YOU STUDY SOCIAL SCIENCE AT WESTERN, you will embark on an academic journey like no other with unique learning opportunities to tailor your education to fit with your personal strengths and career ambitions.

We are one of the largest and most diverse Social Science faculties in Canada, made up of 244 faculty members, 6,700 undergraduate students and 550 graduate students. We cover a vast range of topics all related in one way or another to understanding our social world.

Our professors and students work on a great variety of projects. You will have the opportunity to learn more about the research that is being done, while developing your own university program to fulfill your own aspirations and career goals.

You can also take advantage of the best student experience at one of Canada's most beautiful campuses. Many opportunities exist for you to take your educational learning beyond the classroom. Study, volunteer and work abroad opportunities are available to all Social Science students.

Each department has a student club that organizes events such as awards nights, social activities, philanthropic initiatives and lectures. Plus, our student council is very active with members from all constituencies of our faculty including department representatives, members-at-large, Sophs and first-year students.

At Western, the choice is yours. We look forward to being part of your journey.

Regards,

Joan Finegan
Associate Dean, Faculty of Social Science

The various fields within Social Science include:

- American Studies
- Anthropology
- Criminology
- Commercial Aviation Management
- DAN Management and Organizational Studies
- Economics
- First Nations Studies
- Geography
- History
- International Relations
- Linguistics
- Political Science
- Psychology
- Sociology
- Transitional Justice
- Urban Development
- Women's Studies

Discover Your Passion

Academic Counselling and Student Support

With all of the choices we offer, it can sometimes be difficult to decide exactly what opportunities to pursue or courses to take. Our academic counsellors are available to support you with all academic matters. As well, each department has an academic advisor who can provide information about the department's particular programs.

Classroom Connections to Real-World Experiences

Many opportunities exist for Social Science students to apply their classroom knowledge in real-world settings. You can test-drive a particular job, employment sector, or community organization with our internships and job-shadow opportunities.

Flexible Degree Options

Our diverse programs will offer you a variety of ways to explore the many different fields within our discipline. We offer programs in traditional disciplines as well as interdisciplinary programs. You can focus primarily on one area of study or you can combine two different areas of study—either from within Social Science (such as Sociology and Anthropology) or from another faculty across campus (such as Economics and Philosophy). Many of our modules can be combined with the Honors Business Administration degree offered by the Ivey Business School. In this program you can complete your BA and HBA in five years rather than six.

Let your Western Experience be the map that leads you to your destination.

International Experiences

Study, volunteer or work abroad. Western Social Science offers exchange programs with a number of universities around the world and we encourage students to study abroad for one or two terms. To date, our students have taken courses in over 20 different countries.

Leadership Opportunities

The Social Science Students' Council (SSSC) is a great place to meet new friends and work together to enhance your program at Western. Members of the SSSC work on behalf of all students to ensure their voices are heard. The council funds 11 leadership awards annually valued at \$1,450 each to recognize the accomplishments of our students.

Within each Social Science department there is also a student association that provides students with another forum in which they can share ideas. These groups often organize trips that supplement their formal education. For example, the Political Science Student Association has organized trips within Canada and abroad.

Volunteer Opportunities

Make a difference locally, nationally and internationally. Western offers many experiential learning opportunities in London and beyond. You can participate in Alternative Spring Break, Community Engaged Learning, Western Heads East, Western Serves, Western's Volunteer Program, and more.

Work Experience

Eligible upper-year students have the opportunity to complete a 10-week, paid summer internship. In our job shadowing program, students can also assess the fit of a job by spending a day engaging with a professional working in the field.

Students in American Studies have participated in various research opportunities by exploring archives, monuments, and cities in the United States.

American Studies

American Studies is an innovative program that introduces students to the social, political, historical, and cultural dimensions of the United States. The program also looks at America's role in the world and its relationship with other countries.

Students study American history, literature and arts, as well as social, economic, political and philosophical issues in an effort to understand the meaning and significance of the American identity.

This interdisciplinary program includes courses from English, History, Film Studies, and Political Science, all of which share a common interest in understanding our neighbour to the south.

Areas of Study

- **American Studies** (Major, Minor)
- **American Cultural Studies** (Honors Specialization)
Examines the American cultural identity through courses in literature, art, music, the media, and pop culture.
- **Canadian-American Relations** (Honors Specialization)
Addresses political and economic links, security issues, and cross-cultural identities of the United States and Canada.

Sample Courses

- American Cinema
- American Drama
- American Government and Politics
- Atomic America: The United States during the 1950s
- Guns, Violence, and Freedom in the American Context
- The Cult of Celebrity in American Culture
- Independent Thesis in American Studies

UNIQUE PROGRAM

This program, one of only a handful in Canada, examines current issues in American politics and culture, which shape the world we live in today and the international world of tomorrow.

Given the importance of the United States in the world today, especially to Canadians, a degree in American Studies will prepare students for a host of career possibilities that demand an understanding of the culture and politics of the United States.

Anthropology

Anthropology is the study of people and culture in all periods of history and in all areas of the world. Through sub-disciplines like archaeology, biological/physical anthropology, anthropological linguistics, and socio-cultural anthropology, one can investigate past and present cultures through the examination of artifacts, study human evolution and genetics, examine the nature of communication, and analyze societies and cultures. Examples of topics studied include: the environmental impact of globalization, refugees in the Middle East and Africa, diseases and public health policy in the Ecuadorian Andes, and forensics.

Areas of Study

- **Anthropology**
(Honors Specialization, Specialization, Major, Minor)
The study of people and culture in all periods of history around the world.
- **Bioarchaeological Anthropology** (Major)
The interrelation between biology and culture. Biological diversity and evolutionary history of humans and their close biological relatives.
- **Environment and Culture** (Minor)
The study of cultural, social, political and economic aspects of human relations with the environment.
- **Linguistic Anthropology** (Major)
The connection between language, culture and society.
- **Refugee and Migrant Studies** (Minor)
The study of the movement of populations worldwide.
- **Sociocultural Anthropology** (Major)
Examination of the social and cultural relationships of human groups.

Sample Courses

- Archaeology of North America
- Andean prehistory
- Discourse analysis and linguistics pragmatics
- Field School: Archaeological Summer Field School
- Field School: Environmental Anthropology
- Individuation in Forensic Science
- Prehistoric Civilizations of Mesoamerica
- Refugees and the Displaced

STATE-OF-THE-ART FACILITIES

Students studying Anthropology at Western have access to the Native Language Centre, laboratory facilities, collections and personnel at the London Museum of Archaeology, and an extensive collection of fossil casts and comparative skeletal samples, including an Egyptian mummy donated by the Royal Ontario Museum.

Students studying archaeology can travel to a field camp in Peru while students interested in sociocultural anthropology can go to a field camp in Madagascar and study the impact of eco-tourism on the country.

DAN Management and Organizational Studies

This program provides a unique interdisciplinary approach to management study, emphasizing the social science and evidence-based foundations of management education. The Bachelor of Management and Organizational Studies (BMOS) degree combines a strong foundation in one of six core areas of business education with a broader educational perspective from the Social Sciences and other disciplines.

The DAN Program has adopted an Evidence-Based Management (EBM) perspective throughout its curriculum. This is the first and only explicit adaptation of EBM for management or business education in Canada. EBM brings critical focus to our program and prepares our graduates to make meaningful contributions to management decisions and practices in the organizations they join.

The DAN student council organizes a variety of social events, academic initiatives and networking opportunities. The CAM council also represents students in the Commercial Aviation Management Stream and has organized a Jet-Pull Competition to raise money for charity.

Students can take part in the DAN Management Case Competition. Tournaments are organized across Canada including the cities of Victoria, Toronto, Edmonton, and Montreal. Students who participate in these ventures learn how to analyze companies (both internally and externally), develop detailed solutions, and hone crucial presentation skills.

LEFT: DAN Management and Organizational Studies educates outstanding students with a strong foundation in business combined with a broad education in the social sciences.

RIGHT: The Commercial Aviation Management program is unique in Canada. Students take courses in aviation management as well as more traditional business courses. Those in the flight option can earn their Commercial Pilot's License with Multi-Engine Class Rating and Instrument Rating.

Areas of Study

- **Accounting** (Honors Specialization, Honors Double Major, Specialization)
- **Commercial Aviation Management** (Honors Specialization, Honors Double Major, Specialization)
- **Consumer Behavior** (Honors Specialization, Honors Double Major, Specialization)
- **Finance** (Honors Specialization, Honors Double Major, Specialization)
- **Human Resource Management** (Honors Specialization, Honors Double Major, Specialization)
- **Public Administration** (Honors Specialization, Specialization)

Courses completed during your studies count towards professional designations such as the Chartered Professional Accountants (CPA), Chartered Financial Analyst (CFA) and Certified Human Resources Professional (CHRP).

WHAT'S IN A NAME?

In 2012, the department was officially named DAN Management and Organizational Studies thanks to a \$5-million contribution from Aubrey Dan, BACS'85. Aubrey Dan is a Canadian businessman, philanthropist as well as a Tony-Award® winning producer (MEMPHIS). He is Founder and President of Dancap Private Equity Inc. and Dancap Productions Inc.

Economics

The central idea of economics is that human behaviour is driven by choices regarding how to allocate scarce resources among competing uses. This idea is applied to areas such as health, crime, marriage, sports, poverty, and the environment.

In microeconomics we study the allocation of our scarce resources through models such as demand and supply. We study the choices of consumers and firms, and the role of government in the market. Microeconomics seeks to answer questions such as: Who gains and who loses from a minimum wage? Why are some goods produced in competitive markets and others are not? Is a market with a tax an efficient market? Why is income unequally distributed?

In macroeconomics we also consider the national and world economies. We apply economic tools and models to the questions facing today's exciting macroeconomy that include: Why do some countries experience rapid growth? Why do some countries experience low unemployment and others experience high unemployment? Is a large government debt a concern? Do we want low interest rates and low, steady inflation? Why does Canada's exchange rate appreciate and depreciate against the U.S. dollar?

SUMMER INTERNSHIP PROGRAM

The summer internship program gives you the opportunity to obtain degree-related work experience. The internship includes a paid 10-week work term. The benefits of this program can be seen when you return to school in the fall and when you enter the workforce.

LEFT: Our students have the opportunity to learn from some of the best professors in Canada. In fact, the QS World University Ranking by Subject 2014 listed our Economics department among the Top 5 in Canada.

RIGHT: Western Economics alumnus Stephen Poloz, MA'79, PhD'82, was named Governor of the Bank of Canada in 2013.

Areas of Study

- **Economics**
(Honors Specialization, Specialization, Major, Minor)
- **Economics, Politics and Philosophy**
(Honors Specialization)
- **Financial Economics** (Major)
- **Global Economics** (Honors Specialization)

Combined Degree Option

- **Honors Business Administration and one of the three Honors Specializations in Economics**

Sample Courses

- Econometrics
- Economic History
- Economic Policy
- Industrial Organization
- International Trade and Finance
- Labour Economics
- Public Finance

The First Nations Studies program bridges the community and academy through cultural, political, linguistic, and environmental studies.

A HOLISTIC APPROACH

Visiting Elders, guest scholars and our experienced faculty bring a wealth of first-hand experience working with Indigenous communities, to the classroom.

First Nations Studies

First Nations Studies is an interdisciplinary program of study, examining topics relevant to Indigenous peoples' realities. The program engages political, legal, cultural and linguistic perspectives of the First Nations through the standpoints and voices of Aboriginal people.

Areas of study include history, language, politics, health, environmental studies, cultural studies, economics, arts, psychology, sociology, and education.

Both Native and Non-Native students are welcomed to share their perspectives. Students with an interest in community service learning can participate in language and ecological restoration efforts in neighbouring Indigenous communities.

Areas of Study

- **First Nations Studies** (Honors Specialization, Major, Minor)

Sample Courses

- Algonquian Language and Culture
- Indigenous Environments
- Iroquoian Language and Culture
- First Nations in Canadian History
- First Nations Political and Legal Issues
- Lunaape Language, Culture, and History

Our small class sizes offer students more interaction with their professors. We offer many stand-alone classes but there is also opportunity to take a series of cross-listed offerings with departments such as English, History, Geography, Media, Information & Technoculture (MIT) and Women's Studies.

Geography

Geography is the study of the way the world works. Geographers are interested in some of today's most pressing social and environment issues (for example, global warming). They also conduct research that links human activity with natural systems.

Geographers are also interested in the processes that form the physical environment, as well as the social, cultural, political and economic forces that shape human landscapes. Geographers are well placed to understand the increasingly important interactions between human health and the environment we live in.

Our program in GIS (Geographic Information Science) allows students to create searches, analyze the spatial information, edit data, create maps, and present the results of all these operations.

Urban Development offers an intensive yet balanced education on the nature of urbanism, the processes affecting urban growth, and the methods and techniques used to analyze land use and urbanization.

Areas of Study

- **Geography**
(Honors Specialization (BA or BSc), Specialization, Major, Minor)
- **Environment and Health** (Major)
- **Geographic Information Science**
(Honors Specialization (BA or BSc), Major)
- **Urban Development** (Honors Specialization)
- **Physical Geography** (Major)
- **Geography and Commercial Aviation Management** (Honors Specialization, Specialization)
This program combines aviation courses from DAN Management and Organizational Studies with courses from Geography. Students can have the option to pursue their integrated commercial pilot's license.

Combined Degree Option

- **Honors Business Administration and Geography or Urban Development**

In third year, students have an opportunity to go on a one-week field course. Recent destinations have included Montreal, Kentucky, Kawarthas, and Walpole Island.

Sample Courses

- Cartography
- Climate Change
- Digital Earth
- Geography of Tourism
- Geopolitics
- Public Health and Environment
- Space Exploration
- Urban Cultures of Public Places
- Weather and Climate
- World Rivers

HANDS-ON EXPERIENCE

Geography students can participate in field trips and research projects that address geographical topics. Students can also access our state-of-the-art Map Library and GIS and Physical Geography laboratories.

Our department is home to a number of exciting projects, from the Wartime Canada database, which provides a window into how Canadians at home experienced the World Wars; to the Western Medical Artifact Collection, which gives students hands-on access to medical tools, books and even clothing from the late eighteenth century to the twentieth centuries; to an Environment Canada archival collection which allows us to examine how Canadians have gathered, used and thought about weather-related information since 1840.

DIVERSE ACADEMIC CHOICES

The Honors Specialization in International Relations examines the connections between peoples and states in historical and contemporary contexts. It is a unique interdisciplinary program offered in Political Science and History.

History

History is the study of all past human activity—social, cultural, economic, political, intellectual, military, legal and anything else you can think of. Historians strive to understand the past on its own terms, to learn more about the assumptions, ideas, ambitions, hopes and fears of people living in medieval England or 19th century Canada, Ming China or colonial America, and many other times and places.

In the History department students have the opportunity to explore the past with faculty who are passionate about teaching and learning. Lectures are supplemented with small tutorials, during which students can explore ideas, ask questions and develop skills that provide a firm basis for success in upper-year classes. Our students continue to publish Canada's oldest undergraduate history journal, *The Mirror*, providing students the opportunity to publish and/or gain editorial experience.

Areas of Study

- **History** (Honors Specialization, Specialization, Major, Minor)
- **International Relations** (Honors Specialization)
- **Jewish Studies** (Major, Minor)
- **Middle East Studies** (Major)

Sample Courses

- Britain's Sailors, Soldiers and Empire
- History and Civilization of Medieval Islam
- Killing Fields: Genocide in Modern History
- Korean History
- Plague, Pox and Flu: Disease in Global History
- Political Protest in Canadian History
- Saints and Sinners: Christianity in Historical Context
- The Business of Wine
- The Holocaust
- The Soviet Context
- Wars that Changed the World

Political Science

The influence of politics on our lives is inescapable. The policies and principles which governments endorse and follow shape our everyday lives. The study of Political Science provides students with a chance to examine their lives in this context.

Political Science explores how communities make collective decisions. You can study ideas, activities and problems associated with the governance of nations, states, and societies both past and present. Learn about the impact of globalization, the making of American foreign policy, the role of the courts in politics, political development in the Muslim world and the multilevel governance of Canadian cities.

In your program you can choose to focus on: Canadian politics, political theory, public policy, comparative politics, international relations, and local government.

Areas of Study

- **Political Science** (Honors Specialization, Major, Minor)
- **Combined Honors Business Administration and Political Science**

Sample Courses

- Elections and Voting
- Globalization: Competition and Cooperation
- Political Parties
- Politics of the Environment
- Politics of the Middle East
- Political Theory
- United Nations in the New Millennium

TOP: Recipients of the Social Science Students' Council Leadership awards. This award recognizes students' demonstrated leadership ability and participation in extracurricular activities both on and off campus.

BOTTOM: Western's Political Science Student Association is one of the most active associations in the Faculty of Social Science. Their social and academic programming revolves around the club's five initiatives: (1) to foster a liaison between students and faculty; (2) expose students to post graduate possibilities; (3) advance non-curricular knowledge in Political Science; (4) provide opportunities to gain valuable leadership experience; and (5) to represent the needs and concerns of Political Science students.

COMBINED DEGREES

Students interested in Political Science and Law can complete both an Honors Specialization in Political Science degree and a Law degree in six years instead of the seven years it would take if the programs were pursued separately.

Many of our psychologists in Cognitive Neuroscience conduct research in Western's Brain and Mind Institute. From understanding the developing brain in childhood to deciphering the neural basis of cognitive functions, the Institute is widely recognized as a national and international leader in cognitive neuroscience research.

TOP 100
In the recent QS ratings,
our Psychology programs were
ranked among the top 100
in the world.

An undergraduate degree in psychology is an excellent stepping stone for graduate work in psychology, or advanced training for other fields, such as business, communicative disorders, criminology, education, industrial relations, law, management science, medicine, physical and occupational therapy, and social work.

Psychology

Psychology is commonly viewed as the study of individuals with psychological problems (clinical psychology). However, psychologists also examine behaviour from a variety of different perspectives ranging from how our brain controls our behaviour (behavioural and cognitive neuroscience) to how we interact in small groups (social psychology).

We look at how we perceive, process and remember (cognitive psychology; sensation and perception) and how behaviour changes over our lifetime (developmental psychology). We examine individual differences in behaviour (personality psychology), and apply our knowledge of psychology to understanding behaviour in the workplace (industrial/organizational psychology).

Even different kinds of animals are studied to see what insights they might offer into human behaviour. The Department of Psychology at Western offers a comprehensive undergraduate program providing courses in all these different branches of psychology.

Areas of Study

- **Psychology**
(Honors Specialization (BA or BSc), Major, Minor)
- **Developmental Cognitive Neuroscience**
(Honors Specialization)

Related Programs Available in Science

- **Animal Behaviour**
(Honors Specialization BSc)
- **Neuroscience**
(Honors Specialization BSc)

Combined Degree Option

- **Honors Business Administration and Psychology**

Sample Courses

- Attitude and Attitude Change
- Behavioural and Cognitive Neuroscience
- Clinical Psychology
- Cognitive Science
- Drugs and Behavior
- Exceptional Children
- Mind, Brain and Education
- Psychology of Language
- Psychology @ Work

TOP: Canada's most comprehensive O-Week welcomes new students to campus with the help of more than 800 upper-year student leaders (Sophs) dedicated to guiding students through their first week at Western.

Sociology

Sociology is the study of how society influences what we do and how we think. Sociologists study social behaviour and relationships in an attempt to understand and explain differences, for example, between men and women, the young and the old, people of different nationalities or ethnicities. Comparing and analyzing the different ways that people live and work together is an important aspect of sociology.

Areas of Study

- **Sociology** (Honors Specialization, Specialization, Major, Minor)
- **Sociology of Population, Health and Aging** (Major)
- **Criminology** (Honors Specialization, Major, Minor)

Sample Courses

- Development and Health Inequalities
- Forensics and Criminal Investigation
- Genocide
- International Migration
- Life Is Not Always Fair
- Policing
- Serial Killers
- Social Inequality
- Social Problems
- Sociology of Education
- Sociology of Law
- Sociology of Terrorism
- Sociology of Youth
- Wrongfully Convicted
- Youth in Conflict with the Law

WHAT IS CRIMINOLOGY?

Criminology is the study of nature, extent, causes, and consequences of crime and criminal behaviour in society.

At Western, students studying Criminology are exposed to a sociological approach to crime and deviance.

Women's Studies and Feminist Research: In our courses you will learn how to develop a critical perspective that takes factors such as sex, gender, sexuality, race, class and (dis)ability into account.

Transitional Justice and Post Conflict Reconstruction: Customary law can play an important role in Transitional Justice. In the past, our students have travelled to the Kasubi Tombs, a traditional burial ground for the Kingdom of Buganda, to apply their classroom knowledge in the real world.

Women's Studies and Feminist Research

An interdisciplinary and dynamic field, Women's Studies has undergone impressive expansion in recent decades. In the Department of Women's Studies and Feminist Research at Western, students study women, gender and sexuality in terms of cultural norms and their implications from a variety of feminist perspectives. We explore how gender intersects with other axes of identity such as race, ethnicity, socio-economic standing, (dis)ability, age, and more. Encouraging the development of critical-thinking skills, our discipline asks students to consider how knowledge gets produced and to what effect, with a focus on how gendered understandings shape and shift our world in relation to local experience, historical realities, and the global present.

Areas of Study

- **Women's Studies and Feminist Research** (Honors Specialization, Specialization, Major, Minor)
- **Feminist Theory** (Minor)
- **Gender, Sexuality and Culture** (Minor)
- **Sexuality Studies** (Major)

Combined Degree Options

- **Honors Business Administration and Women's Studies**

Sample Courses

- Feminist theory and practice across the Disciplines
- Gender, Sexuality and Disability
- Gender, Justice and Change
- Making Men: Critical Studies in Masculinity
- Sexuality Studies
- The Body
- Women and Popular Culture: Garbo to Gaga
- Women Artists and their Unconventional Images of Women

Transitional Justice and Post Conflict Reconstruction

Transitional Justice examines measures that have been implemented by different countries in order to redress the legacies of massive human rights abuses. These include criminal prosecutions, truth commissions, reparations programs, and various kinds of institutional reforms. Transitional Justice is not a 'special' kind of justice, but an approach to achieving justice in times of transition from conflict and/or state repression. By trying to achieve accountability and redressing victims, transitional justice provides recognition of the rights of victims, promotes civic trust and strengthens the democratic rule of law.

Areas of Study

- **Transitional Justice and Post Conflict Reconstruction** (Minor)

Our graduates work in a multitude of fields and industries, including:

- Advocacy
- Community and International Development
- Education
- Financial Services and Analysis
- Focus group analysis—lobby groups, strategic marketing companies, conflict resolution consultant
- Foreign Service Officers
- Forestry
- Government and Non-Profit
- Housing
- Human Resources
- Management
- Media
- Mental Health Services
- Political-risk analysis departments of international corporations
- Policy development in such areas as: health care, international development, social policy, environmental policy
- Politics
- Preservation and Restoration
- Public affairs departments in private companies
- Public Interest Work
- Research
- Research assistants for members of Parliament, federal & provincial
- Social Services
- Third World development agencies
- Urban and Regional Planning
- Writers for websites

92% of our grads find employment within two years of graduation

Preparing for the Future

We are committed to developing graduates who can adapt to the rapidly changing global environment. A social science degree provides a variety of skills that are instrumental in responding to the demands of a world that is continually transforming.

Through course work and extracurricular activities, students are encouraged to develop their analytical and critical thinking abilities. Moreover, they gain greater confidence and aptitude for public speaking and develop strong organizational and overall communication skills. Many of our modules also develop the ability to conduct independent research.

We are continually working to build bridges between academic learning and real-world experiences. To facilitate this, we offer job-shadowing opportunities, internships, a mentorship program and one-on-one appointments with academic counsellors.

Western's Career Services helps you:

1. Build résumés and write cover letters.
2. Develop interview skills.
3. Discover career possibilities.
4. Gain focus and clarity in your career search.
5. Translate your academic interests into a career path.

Explore Canada's Most Beautiful Campus In Person!

During our **FALL PREVIEW DAY** and our **MARCH BREAK OPEN HOUSE** you will have a chance to meet with our Social Science faculty, staff and students and learn why Western offers the best student experience. Get an in depth look at your future academic program, our residences, the strong network of support services that will help to ensure your success, and our beautiful campus.
